The Connected Home and Business

Honeywell's Tuxedo Touch™ is a magnificent, 7" graphic touchscreen that functions as a home and building automation controller, integrated security system, camera viewer and digital picture frame. It's intuitive, easy to learn and easy to use.

Look at Everything You Can Do...from the Keypad or Your Smartphone!

- Convenient, on-premises control of the system through your smartphone, PC or compatible mobile device
- Graphic icons with menu-driven prompts make security and control simple and intuitive
- Manage energy costs with thermostat and lighting control
- Lock and unlock doors automatically
- Open and close shades
- Video surveillance right at the keypad or through local web-enabled devices

inside center

On Premises Control

Control Tuxedo Touch™ locally in your home or business on an iPhone®, iPad®, Android™, BlackBerry® or any compatible wireless mobile device.*

Energy Management and Savings

You can automate or schedule control of thermostats and lights, saving you money on your energy bill.

Video

View live video of up to four cameras around the premises on the Tuxedo Touch, smartphones and tablets.

Notice To All Employees

Parking lot A2 will be closed all day on Monday, October 5, due to resurfacing. Please use lot C2 for employee parking.

Thank you

Digital Picture Frame/Communications Tool

- Business owners can post employee announcements, advertise sales and more
- Homeowners can showcase photos in style and create cinema-quality slideshows
- Homeowners can play personal videos and business owners can play commercials from an SD card right at the touchscreen

*On premises control requires Wi-Fi. Ask your installation professional for more information. iPhone and iPad are registered trademarks of Apple® Inc. All other trademarks are property of their respective owners.
